... THE ULTIMATE TRACK DAY EXPERIENCE ...

CUSTOM DESIGNED LEATHERS MADE TO FIT!

As worn in MotoGP, Moto2, Moto3, WSB, BSB, Isle of Man, World Endurance, etc.

Made to measure and to your specifications – one-piece or two-piece suits – for men and for women

Wholly made in Europe by highly-skilled craftsmen & women using only the very finest materials

Hundreds of options available – choose your design, colours, materials, protection, and more

Online designer available – select your colours and see how it looks – create something unique today!

Any graphics or logos you need can be printed onto your suit, or cut out in leather and sewn on

Uncompromised quality – every detail of your suit is made to exactly the same standard as the top racers

Full aftersales support – repairs, alterations, modifications, and cleaning/refurbishment available

Custom-designed from £600 incl. VAT – high-quality made-to-measure suits for off-the-peg prices!

Karel Abraham: MotoGP

Gino Rea: Moto2

The PSI team

WHO ARE PSi?

Based near Brno Circuit in the Czech Republic, PSi was originally formed in 1990 by a 25 year old Czech racer named Libor Hubík. He saw the need for high quality made-to-measure leathers for racing, but none were available locally, hence the PSi story began.

PSi now consists of a 38 strong team of highly-skilled, experienced and dedicated craftsmen and women working to the very highest standards and using only the very best materials.

They offer a wide range of motorcycle clothing (and more recently Ski wear) including off-the-peg items, but custom made leathers are (and have always been) their passion and the heart of their business.

WHY CHOOSE PSi LEATHERS?

There are some key differences between PSi and most other manufacturers...

The major brands that manufacture off-the-peg suits spend a huge amount on marketing, and this cost has to be covered somehow. So in order to remain price-competitive, most have outsourced their manufacturing to Asia and the Far East. The major-branded suits worn by the top racers are of course made to the very highest standards, but these are not the same as the off-the-peg suits available to the public.

Max Neukirchner: WSB

Jamie Poole: BSB

PSi do not outsource manufacture because they want to maintain the highest levels of quality. Of course, because you choose the materials, colours & options, your suit won't be identical to those worn by the top racers (unless you choose all of the same options that is), but your suit will be made to the same high standard, by the same people, in the same factory, using the same materials, the same machines and the same technology.

And PSi do not skimp on materials or manufacturing methods to save money. For example, if you specify cowhide, you get the finest Italian hide. And all seams are double (or triple) stitched with one seam hidden beneath the outside surface so that it is protected from abrasion, and so on.

PSi also offer an unrivalled choice in terms of the design, materials and finish for your suit – pretty much anything is possible. Even if you cannot find what you want using the online suit designer, it's not a problem – PSi can custom design anything you want – style, colours, materials, graphics, logos, protection – everything can be configured to your exact requirements. In fact, the list of options is almost endless!

Finally, PSi leathers offer exceptionally good value. Their entry level suits provide high quality made-to-measure leathers for a much the same price as a good quality off-the-peg suit. And if you compare the specifications like-for-like, even their most expensive top-of-the-range leathers are cheaper and usually include more extras than most other made-to-measure items. Former WSB rider and MotoGP winner Simon Crafar had this to say about his PSi leathers...

"My mechanic carefully took my measurements following the PSi instructions (22 different measurements!), and I emailed them to PSi. A couple of weeks later my new PSi Motovudu leathers turned up, and they were every bit as good as I hoped they'd be. They are very high quality, and they fit like a glove (no 'running-in time' necessary). The freedom of design PSi give is incredible. With laser cutting and leather printing technology they can do any design you want, no matter how detailed.

A few months after receiving the suit I visited PSi in the Czech Republic. The factory is very high tech and professional. Every suit is stored on computer and laser cut, so they can replicate part of your suit if repairs are required.

The owners are a husband and wife team – they are lovely people who really do care about quality and customer service. And after wearing the suit and meeting the people, I'm proud to be a PSi rider."

So if you are fed up with "one-crash-leathers" or you want something unique that fits you properly and is built to last but won't break the bank, PSi has the answer.

NEED MORE INFORMATION?

To learn more about PSi and their range of products, or to use the online suit designer, please visit the PSi website at <http://www.psihubik.cz/en>
